

PRODUCT NEWS

PRIMOWASH clean your concrete mixer drum in only 8 minutes

PRIMOWASH is a washing plant for the drum of concrete mixer trucks. The washing lasts for 8 minutes only and is a financially good investment. The plant can be placed in the existing washing plant area, without further foundation. You just have to connect water and electricity - and the plant is ready to use.

Why should you invest in a washing plant?

- It makes sense to clean a drum so it always runs with full cargo of concrete.
- Easily and quickly cleaning of the concrete mixer drum in spite of manual cleaning which takes far more time, and cleaning with gravel leaves a waste product.
- The employee does not have to get into the drum in order to remove residual concrete, which is dangerous.
